DÁRIO GABRIEL

SOFTWARE ENGINEER

PERSONAL RESUME

Native to the banks of the lower Solimões river, I take great pride in my riverside origins in the Amazon. I am a passionate enthusiast of technology and programming, driven by the relentless pursuit of results. My skills include exceptional communication, coupled with a solid command of systems and ease of adaptation.

SOFT SKILLS

My main interpersonal skills include clear and straightforward communication, which facilitates collaboration with diverse teams. I adapt easily to different contexts and work environments, maintaining an empathetic posture and openness to feedback. Additionally, I value organization and proactivity in problem-solving, always seeking creative solutions that yield positive results for everyone involved.

OBJECTIVE

Eager to join Ciklum as a PHP Developer, contributing with my expertise in Symfony, message brokers, and cloud environments to build innovative and high-performance solutions for international teams.

RECENT EXPERIENCES

Software Engineer Sr.

Leadtech, Barcelona, Spain
October, 2025 - Present Time

- Development of robust backend services and APIs using PHP with Symfony, leveraging Doctrine ORM for data persistence and advanced domain modeling.
- Designed and implemented asynchronous processing with queues (RabbitMQ / message-driven architectures) to improve scalability and performance.
- Strong experience with PostgreSQL, including schema design, query optimization, migrations, and transactional integrity.
- Applied SOLID principles, DDD, and Hexagonal Architecture, ensuring maintainable, testable, and highly decoupled systems.

Software Engineer Sr.

Global HITSS Brasil - Rio de Janeiro - Brazil |
October, 2024 - October, 2025

- Development of APIs and backend services using PHP (Symfony, Laravel, Lumen).
- Built and maintained CI/CD pipelines with Jenkins and Dockerized environments.
- Experience with message brokers (RabbitMQ, Kafka) and cloud services (AWS, GCP).
- Designed systems following SOLID, DDD, and Hexagonal architecture principles.

Mid-Level Software Engineer

Westwing Brasil - São Paulo - Brazil |
October, 2022 - October, 2024.

- Development of APIs and backend features using Symfony, Laravel, and Node.js.
- Worked with messaging systems (RabbitMQ, Kafka), logs, and caching strategies.
- Applied Clean Architecture, SOLID, and design patterns in legacy and microservices-based systems.
- Daily collaboration with multidisciplinary teams using Scrum and Kanban.

Software Engineer Sr.

Vekttor - iComanda - Manaus - Brazil |
April, 2019 - October, 2022.

- Led the team in maintaining and modernizing legacy PHP systems.
- Developed internal systems in Node.js, Vue.js, and React.
- Created features such as invoice issuance via SAT, WhatsApp messaging API, and distributed P2P server.
- Built CI/CD pipelines and contributed to system scalability and performance optimization.

ACADEMIC BACKGROUND

Estácio de Sá - AM, Brazil

Bachelor of Computer Science | Graduation in 2023/02.

Cenes (Faculdade Focus) - SC, Brazil

Postgraduate in Software Engineering | Completion in 2024/02.

Uninectar - MG, Brazil

Postgraduate in Teaching in Information Technology | Completion in 2024/02.

UPGRADES AND NEW CHALLANGES

- Flutter
- Kotlin
- Python
